- ✔ 33 Components
- ✔ Fully Responsive
- ✔ No Build Step
- ✔ Dark Mode Ready

LAYOUTS

Page layouts

Three ready-made layouts to start your dashboard.

Dashboard Layout

Sidebar + topbar + content area

Sidebar

Collapsible sidebar component

Topbar

Search + user dropdown

COMPONENTS

Ready-made components

Copy any component into your own project. Each page is self-contained.

Buttons

6 variants × 3 sizes, with icons

Form Inputs

All input types + validation states

Data Tables

Striped, hover, with actions

Stat Cards

4 stat card variations

Modals

4 sizes + confirmation dialogs

Alerts

Success, error, warning, info

Charts

Line, bar, doughnut, area (Chart.js)

Tabs

Horizontal + vertical

Pagination

Numbered + prev/next

Badges & Pills

Status, count, notification

Toasts

Notifications that auto-dismiss

UTILITY PAGES

Ready-made pages

Common error and utility pages — plug and play.

404

500

Coming Soon

Maintenance

Empty State

No Build Step

Just HTML + Tailwind CDN. No npm, no webpack, no CLI.

Fully Responsive

Mobile-first. Tested down to 375px on every component.

Dark Mode Ready

Add the `dark` class on `<html>` and everything adapts.

Well Documented

Every component has its own page with copyable snippets.

Need custom development?

This UI Kit is a starting point. We also build complete web applications — custom features, integrations, and full products.
