

THE CREATOR ECONOMY OPERATING SYSTEM

The AI Content Machine

Automate your income with a repeatable content system

JORDAN VANCE

PREVIEW

"You don't need to post more. You need a machine."

Most creators don't have an idea problem — they have a systems problem. This book reframes content creation as an operating system: **Input** → **Process** → **Output** → **Monetize**.

You'll get the exact operating system behind creators who've turned scattered content habits into predictable income: a repeatable pipeline from idea to published asset, a method for turning one article into ten pieces of content, and five real monetization models compared side by side.

What's Inside

- How to choose a profitable niche using the four-part niche test
- A 9-stage AI content production pipeline you can run weekly
- Research and ideation systems that scale without burning out
- AI-assisted writing that keeps your voice, not a generic tone
- Turning one piece of content into ten across every channel
- Five monetization models compared: services, products, memberships, sponsorships, affiliates
- Building an "AI content team" with clear roles and escalation rules

Includes: 9 chapters · a 60-day build plan (four two-week sprints) · role cards for your AI content team · a reusable content brief and pre-publish quality checklist.

Get the full playbook and start building your content machine today.

This is a promotional preview. The full book contains detailed chapters, worked examples, and a step-by-step action plan.
