FULL-SCREEN SAMPLE 01 // IPHONE 16 PRO MOCKUP

01 // Apex-Core (Neural Cybernetics)

Ultra-fine micro-die traces radiating from a 2nm quantum logic core. Tested on iOS 18 with full widget clearance.

Design Geometry Analysis

The central silicon die is placed at exactly 54% screen height, ensuring that iOS time, date, and lock screen widgets sit in an uncluttered, deep space zone with 0% visual obstruction.

OLED Substrate Quality

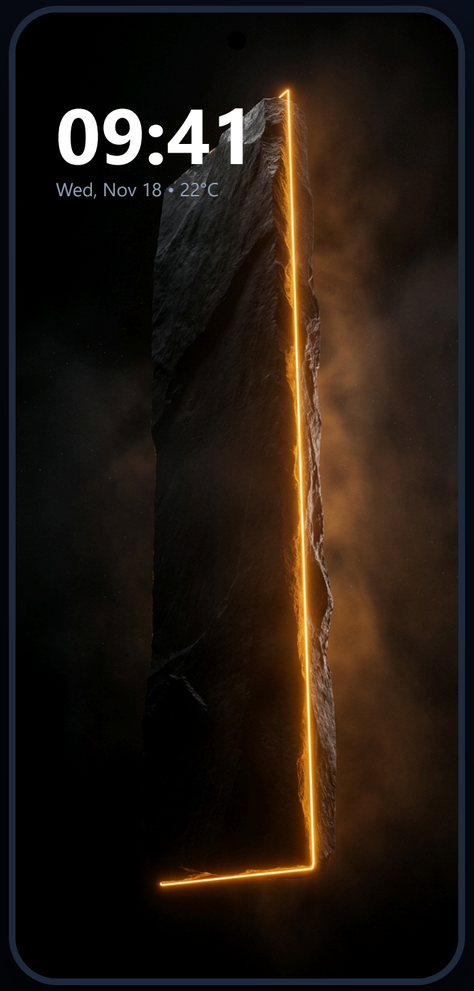

Black pixels are encoded at absolute #000000, turning off OLED and Super AMOLED diodes completely. This delivers infinite contrast ratios and preserves battery life during everyday screen use.

INCLUDED IN MASTER ZIP IN 1170x2532 & 1080x2400

FULL-SCREEN SAMPLE 02 // SAMSUNG GALAXY S24 ULTRA MOCKUP

02 // Titan-Monolith (Dark Geometry)

Towering obsidian geometric monolith lit by laser rim light. Optimized for Android 20:9 edge-to-edge displays.

Architectural Minimalist Weight

Features dual-facet chiaroscuro lighting on high-tensile carbon titanium facets. Subtle atmospheric lighting adds depth without creating visual noise or distracting from app icons.

Universal Android Adaptation

The 1080 x 2400 aspect ratio matches modern 20:9 screens perfectly, eliminating stretching or ugly side crops on Samsung One UI, Google Pixel OS, Nothing OS, and OxygenOS.

INCLUDED IN MASTER ZIP IN 1170x2532 & 1080x2400

INSTALLATION & LEGAL TERMS

Setup Guide & License Terms

How to install your wallpapers in under 30 seconds on any smartphone.

iOS Setup Instructions

1. Unzip the archive and open the `iPhone-1170x2532` folder.
2. AirDrop or save your chosen wallpaper to your Photos library.
3. Go to **Settings → Wallpaper → Add New Wallpaper**.
4. Select the image from Photos.
5. Pinch slightly to verify alignment, and tap **Add** or **Set as Wallpaper Pair**.

> Pro Tip: Turn off "Depth Effect" if you prefer the clock font to stay crisp and uncluttered.

Android Setup Instructions

1. Transfer the `Android-1080x2400` folder to your device.
2. Open your phone's Gallery app and locate the desired wallpaper.
3. Tap the three dots menu (⋮) and choose **Set as wallpaper**.
4. Choose **Lock screen**, **Home screen**, or **Both**.
5. Confirm and tap **Done**.

> Pro Tip: Select a subtle dark accent color in Material You palette settings to match the neon accents.
